

Firas Mostafa

Software Engineer | Flutter & AI Backend Developer | portfolio: <https://firas-mostafa.github.io/portfolio/>

Damascus, Syria | +963 996 967 668 | firassmostafa15@gmail.com

GitHub: github.com/firas-mostafa | LinkedIn: linkedin.com/in/firassmostafa

SUMMARY:

Software Engineer specializing in cross-platform Flutter development and AI-driven backend systems (Django, PyTorch). Skilled in Clean Architecture (BLoC), real-time WebSockets, RAG pipelines, and Docker containerization.

EDUCATION:

Alsham Private university

Bachelor of Engineering in Informatics Engineering (AI Specialization) | 2021 – 2026

TECHNICAL SKILLS

- **Mobile Development:** Flutter, Dart, BLoC / Cubit, GetX, Provider, RESTful APIs, WebSockets, Google Maps SDK, Google Fit Telemetry
- **Backend & Databases:** Python, Django REST Framework, Daphne (ASGI), FastAPI, Celery, Redis, Docker, Docker Compose, PostgreSQL
- **AI & Machine Learning:** PyTorch, RAG Pipelines, LangChain, Vector Search (BGE-M3), Gradient Boosting (XGBoost, LightGBM, CatBoost), Ollama, Faster-Whisper ASR, ResNet MLP
- **DevOps & Tools:** Git, GitHub Projects (Agile/Kanban), Firebase (Auth, FCM, Firestore), Postman

SOFT SKILLS:

Analytical Problem-Solving | Agile Team Collaboration | Technical Documentation | Fast Learning

FEATURED PROJECTS

Ursa – AI-Driven Health Assistant & Triage Platform (Graduation Thesis): Flutter (BLoC), Django ASGI, WebSockets, Docker, PostgreSQL (pgvector), PyTorch, LangChain, Celery

- Built a smart healthcare platform integrating habit tracking, smartwatch vitals telemetry, and AI medical triage.
- Implemented a hybrid AI engine: RAG pipeline with vector search (BGE-M3), Faster-Whisper ASR, and real-time streaming chat.
- Trained a ResNet MLP model (95.88% Top-3 accuracy) and a Gradient Boosting ensemble (0.9295 ROC-AUC) for severity classification. **Jan 2026 – Sep 2026**

TasteCraft AI – AI-Powered Recipe & Cooking Assistant: Flutter, Django REST Framework, Docker, PostgreSQL, TDD

Repository: github.com/firas-mostafa/tastecraft-ai

- Developed a full-stack AI recipe platform featuring a cross-platform Flutter app and Django REST backend.
- Engineered backend APIs using TDD, Docker containerization, token authentication, and AI-driven recipe generation. **May 2025 – Sep 2025**

AgriSphere – Smart Agriculture & Crop Health Management: Flutter, Dart, REST APIs, ML

Repository: github.com/firas-mostafa/agri_sphere

- Built a cross-platform Flutter app for smart crop monitoring, field analytics, and data-driven farming decisions.
- Integrated RESTful APIs and machine learning model outputs to deliver real-time crop health insights and diagnostics. **(Team Project) Sep 2025 – Dec 2025**
