Firas Mostafa

Flutter Developer | Cross-Platform Mobile Apps

Damascus, Syria • +963 996 967 668 • firassmostafa15@gmail.com

GitHub: github.com/firas-mostafa • LinkedIn: linkedin.com/in/firasmostafa • Portfolio: firas-mostafa.github.io/portfolio

SUMMARY

Flutter Developer building cross-platform apps with Flutter and Dart, from responsive, design-faithful UI to REST API and Firebase integration. Experienced with Clean Architecture, BLoC/Cubit, GetX and Provider, Flutter Web, real-time WebSockets, and SDKs such as Google Maps and Google Fit. Freelance experience extending a large third-party Flutter codebase for a client, plus three apps delivered end-to-end. Software Engineering graduate (2026); available for project-based, remote, or on-site work.

TECHNICAL SKILLS

- **Flutter & Dart:** Flutter, Dart, Flutter Web, responsive layouts, custom widgets, charts & dashboards
- **State Management & Architecture:** BLoC / Cubit, GetX, Provider, Clean Architecture, reactive streams
- **Firebase & Integrations:** Firebase (Auth, FCM, Firestore), REST APIs, WebSockets, Google Maps SDK, Google Fit SDK
- **Version Control & Workflow:** Git, GitHub Projects (Agile/Kanban), Postman, TDD (unit & integration), CI/CD basics
- **Backend & AI (supporting):** Python, Django REST Framework, FastAPI, Docker, PostgreSQL, Redis, Celery, PyTorch, LangChain

EXPERIENCE

Freelance Flutter Developer — Food Delivery Platform (Client Project) | *Flutter, GetX, Google Maps, Flutter Web*

Sep 2024 – Jan 2025 • Sole developer

- Customized a white-label multi-vendor food delivery platform (StackFood: customer, restaurant and delivery apps, built with Flutter and GetX) for a client, working within a large, undocumented third-party codebase.
- Restored the broken Flutter web app and got the other apps running on the web, reworking their layouts to be fully responsive across mobile, tablet and desktop.
- Upgraded the Flutter SDK and dependencies, fixed build and runtime issues, and deployed the web apps to Hostinger.

FLUTTER PROJECTS

Ursa — AI Health Assistant & Triage App (Graduation Thesis) | *Flutter, Dart, BLoC, Firebase FCM, WebSockets, REST*

Jan 2026 – Sep 2026 • Solo project • Demo video: youtu.be/WBz_ei6zKjU

- Built the cross-platform Flutter app end-to-end: real-time AI chat over WebSockets, smartwatch vitals sync via the Google Fit SDK, daily habit tracking with interactive analytics dashboards, and automated PDF medical report generation.
- Structured the app with Clean Architecture and BLoC, separating UI, business logic, and data layers.
- Integrated FCM push notifications, biometric login, and a care-plan scheduler with 24-hour follow-up reminders.
- Connected the app to a Dockerized Django REST/ASGI backend (Celery, Redis, PostgreSQL) powering a medical RAG assistant (Gemma 3-4B via Ollama) and ML triage models (85.97% Top-1 / 95.88% Top-3 accuracy, 0.9295 ROC-AUC).
- Wrote 80 unit and integration tests (100% pass rate); load-tested at 87.72 req/s with 0% errors.

AgriSphere — Smart Agriculture & Crop Health App | *Flutter, Dart, REST APIs, Data Visualization*

Sep 2025 – Dec 2025 • Team project • github.com/firas-mostafa/agri_sphere

- Built the Flutter app for smart crop monitoring, from UI design to responsive screens with field analytics dashboards, integrating REST APIs and ML model outputs for real-time crop health diagnostics.
- Worked in an Agile team workflow (Git, GitHub Projects/Kanban), owning the mobile side end to end.

TasteCraft AI — AI-Powered Recipe & Cooking App | *Flutter, Dart, REST APIs, Django REST, Docker*

May 2025 – Sep 2025 • github.com/firas-mostafa/tastecraft-ai

- Developed a cross-platform Flutter app for AI-driven recipe generation on a Django REST + JWT backend.
- Built the backend API with TDD and containerized it with Docker for consistent deployment.

EDUCATION

Al-Sham Private University — Damascus, Syria

B.Eng. in Informatics Engineering (AI Specialization) | 2021 – 2026

LANGUAGES

Arabic: Native • **English:** Professional working proficiency (strong written)
